FORANAFT

Arrival from the
Gallery of Australian Design

now! No.15

Introducing the latest range by Hülsta

Welcome...

As spring hits our doorsteps with fruitful blooms, so too does our showroom with the latest creations from this year's Milan iSalone del Mobile. A bumper year for Ultimo as our number of international collections rose to nearly twenty design houses from Italy, Germany, Switzerland and Australia: our first new seasons designs are hitting the floor starting with Sartori Rugs. With a history of more than 130 years of craftsmanship, they are a most welcome addition to the Ultimo stable.

And with the shift of season we dust ourselves off ready for another Summer. Adding to Varaschin, Ultimo will be launching outdoor pieces from Belgium's Royal Botania. In your choice of timber, glass or even ceramic tops, their dining tables offer a unique adaptability with extendable and circular options for outdoor areas. They even have marine grade ranges suitable for your boat!

Make sure your back garden is ready for Summer and get some fresh ideas at Ultimo.

Andrew Thornton Hick
Brand & Commercial Manager

NEWS FLASH! now! no.15

Launched in Milan this year, the new **now! no.15** range by Hülsta has colour, curves and ultra-modern features down to a T.

Matt lacquered surfaces in luscious Grey or stunning White are accompanied by striking colour accents in Night Blue, Violet and Lemon. Glass units are built with an innovative light shelf and tinted glass insert where you can display what lies within under beautiful coloured light. You can adjust the colour, from blue to green to purple or pink, the strength of the light, and the pattern and speed of the colour

changes are all controlled by you at the simple push of a button.

now! no.15 will create the perfect ambiance, whether it be for relaxing with family or entertaining guests. Freestanding, suspended and stacked units can be individually combined, so you can create unique wall shelving or storage. A special feature of the new range are the distinctive soft curved edges on the fronts.

now! no.15 will be arriving at Ultimo Interiors in November 2011.

outdoor news

ROYAL BOTANIA

The latest addition to Ultimo's outdoor collection is Royal Botania, luxury outdoor furniture suitably described as being "for those who adore the aesthetic refinement of furniture and living spaces".

Originally designed in teak wood, the ranges now also incorporate stainless steel, aluminium and synthetic fibres - all with a superior world-renowned quality and design that will truly wow you.

Royal Botania will officially launch at Ultimo Interiors later this year with pieces such as the NINIX outdoor dining range and O-ZON round table. O-ZON is a fantastic piece that is set to storm your outdoor decks this summer, available up to 185cm in diameter with an in-built lazy susan - perfect for comfort and company

ROYAL BOTANIA

VARASCHIN

Having launched in October 2010 at Ultimo Interiors, Varaschin's arrival into Australia has been eagerly received.

The quality of Varaschin furniture is most suitable to our intense climate, with strong sea breezes and intense heat and UV, and has a deserving place in the Australian market as the most resilient outdoor furniture.

Varaschin's 2011 Outdoor Collection will continue to impress, with the SUMMER SET range of single shell chairs, armchairs and bar stools designed by Christophe Pillet. Linear weaves of metal cables supported by a steel frame create remarkable comfort, and soft seat and back cushions are the perfect finishing touch for a summer of long and lazy days spent sitting outside.

VARASCHIN

FORANAFT chair

ARRIVES FROM THE GALLERY OF AUSTRALIAN DESIGN

Andrew Thornton Hick's FORANAFT chair has just returned from the Australian Chair Survey Exhibition at the Gallery of Australian Design in Canberra. Having been selected to feature alongside 13 other hand-picked chairs from Australia's leading industrial designers the FORANAFT is now back at Ultimo Interiors after 5 weeks on display.

The outdoor, stackable coffee stool/chair was designed for fast-paced urban cafe's, and was originally designed whilst Andrew studied at the Western Australian School of Art and Design (WASAD). At the time 3D CNC routers were not available in Perth so this prototype was made entirely by his hand in a workshop.

Inspired by Western Australian's unique geography, the layers of marine ply and zinc alum spacers visually reiterate the layering of rock strata visible along our coast, mirroring this formation in both form and colour.

FORANAFT has also won commendation from the FIAA(WA), and was selected for the Craftwest Centenary Exhibition which toured Australia.

See the FORANAFT chairs in the showroom now.
